

# CHANAGUN KHUNPHET

Software Engineer Intern

📞 093-161-3142    ✉️ totemsan0.1@gmail.com    🌐 github.com/kaitidfun

## 👤 PROFILE

A Software Engineering student bridging the gap between **code** and **creativity**. Experienced in **full-stack** feature development, **IoT**, and **API integrations**, with a keen interest in applying **technology** to **multimedia production**, **video generation**, and **interactive media**.

## 🎓 EDUCATION

### B.S. in Software Engineering

Chiang Mai University, College of Art Media and Technology, (CAMT)

🕒 2023 - current  
(Expected Grad: 2027)  
GPAX: 2.92

## 💡 HARD SKILLS

### AI & Emerging Tech:

Generative AI Integration(LTX, Gemini), AI Automation

### Hardware & IoT:

Arduino, Circuit Design, Sensor Integration

### Design & Tools:

Figma(UX/UI), GitHub, VS Code, Claude Code

### Programming Languages:

Python, JavaScript, C++

## 📁 PROJECTS

### ReelCast (Senior Project)

- **Automated full commercial video generation** by integrating LTX and Gemini APIs.
- **Developed core features end-to-end** and integrated API endpoints for a seamless system workflow.
- *Tech Stack: Python, FastAPI, Generative AI (LTX, Gemini)*

### IoT Gesture-Controlled Media Player

- **Built a touchless media control system** using Python (Computer Vision) and Arduino.
- **Integrated Spotify API** to translate real-time hand gestures into playback commands.
- *Tech Stack: Python, Arduino, Spotify API*

### Nature Conservation Game (CAU x CMU Hackathon)

- **Designed UI/UX prototypes (Figma)** for an educational app under intense time constraints.
- **Collaborated cross-functionally** with a diverse team, demonstrating rapid problem-solving.
- *Tech Stack: Figma, Teamwork, Rapid Problem-Solving*

(**Certifications:** CAU x CMU Joint Hackathon | Institution: Chiang Mai University & Chung-Ang University 2025)

## 🧩 SOFT SKILLS

**Team Collaboration:** Divided development by features and integrated them seamlessly with a teammate.  
**Effective Communication:** Presented progress to advisors and applied feedback to hit project milestones.  
**Rapid Problem-Solving:** Resolved critical issues under strict time constraints during a joint hackathon.
