

CHANAGUN KHUNPHET

Software Engineer Intern

093-161-3142 totemsan0.1@gmail.com github.com/kaitidfun my-portfolio-web-neon.vercel.app

PROFILE

A Software Engineering student bridging the gap between **code** and **creativity**. Experienced in **full-stack** feature development, **IoT**, and **API integrations**, with a keen interest in applying **technology** to **multimedia production**, **video generation**, **interactive media**, and **3D art**.

EDUCATION

B.S. in Software Engineering
Chiang Mai University, College of
Art Media and Technology, (CAMT)
2023 - current
(Expected Grad: 2027)
GPAX: 2.92

HARD SKILLS

AI & Emerging Tech:
Generative AI Integration(LTX,
Gemini), AI Automation

Hardware & IoT:
Arduino, Circuit Design, Sensor
Integration

Design & Tools:
Figma(UX/UI), Blender, GitHub, VS
Code, Claude Code

Programming Languages:
Python, JavaScript, C++

PROJECTS

Gesture-Controlled Media Player
• **Built a touchless media control system** using Python (OpenCV, MediaPipe) and ESP32-CAM.
• **Integrated Spotify API** to translate real-time hand gestures into playback commands.
• *Tech Stack: Python, ESP32-CAM, Spotify API*

ReelCast (Senior Project)
• **Automated full commercial video generation** by integrating LTX and Gemini APIs.
• **Developed core features end-to-end** and integrated API endpoints for a seamless system workflow.
• *Tech Stack: Python, FastAPI, Generative AI (LTX, Gemini)*

QuORuM (Personal Project)
• **Built a 207-card narrative survival game** in React/Three.js with a custom weighted engine.
• **Shipped full Thai/English localization** with a custom word-segmentation build step.
• *Tech Stack: React, react-three-fiber, Three.js, i18n*

SOFT SKILLS

Team Collaboration: Divided development by features and integrated them seamlessly with a teammate.
Effective Communication: Presented progress to advisors and applied feedback to hit project milestones.
Rapid Problem-Solving: Resolved critical issues under strict time constraints during a joint hackathon.
